

silverprills

Increase Energy Density of Feed

Palm Fat Supplement

A superb quality, highly digestible palm fat

Features & Benefits

- **High C16 Content**
- **Extremely High in Energy**
 - Crude Fat 99%
- **Consistent Quality**
 - Produced in one factory, resulting in consistent quality.
- **Palatability**
 - A palatable product for use as a top dress or in TMR's.
- **Easy to Handle**
 - Snow-white, free-flowing mini-prills are easily handled and incorporate well into the ration.

Feeding & Using

- Silver Prills can be incorporated into a total mixed ration, top-dressed onto forage or included in a blend. Silver Prills can also be incorporated into dairy grain rations or supplements.
- **Feeding Rates**
 - **Dairy Cows:** up to 500g/head/day
 - **Milking Goats & Ewes:** up to 50g/head/day

Production Process

- Silver Prills is based on palm stearin, a by-product from the processing of palm oil. The crude palm oil is cleaned, distilled and then fractionated to purify the C16 content.
- **Storing**
 - Store out of direct sunlight in a cool, dry place. Stack pallets no more than two high.
 - **Shelf Life:** 15 months from date of manufacture.

Registration #991122

Typical Analysis (% dry matter unless stated otherwise)	
Dry Matter	100
Oil (B)	99
ME (MJ/kg DM)	37
C16:0	85-90
C18:0	2-4
C18:1	6-7
C18:2/3	1-2
C14 and below	1-2
Free fatty acids (% oil)	93-96
Ash	0
